
Acadlp.msi Autocad 2010 17

Hello, we tested deploying AutoCAD 2011 with the Deployment Wizard and SCCM ... INI file, I don't see any evidence that setup.exe even runs acadlp.msi . This should start before you do step 1 i.e. with the setup wizard The Installation and Configuration Wizard must be installed to run the installer. This should be enabled in step 3. You have two options: 1) You can manually add setup.exe to the system by placing it on your local computer as a setup file (otherwise it will not run). 2) Create an installation folder in the root directory of drive C: and place setup.exe there.
