Stardust Empire takes place in the distant future. Global warming has transformed the world and half of its population is facing a miserable life in the southern hemisphere. The few who remain have colonized Mars, a planet that is extremely cold. The people who survive must spend the rest of their lives in a severe climate. In this brutal environment, they build star cities in the southern hemisphere. Enter a group of space pirates who want to get rich by trading on their ships. They hijack the planets' starships, and they destroy them. After they have taken over, the pirates begin to plunder the planets' wealth. The player's task is to destroy the pirates and rescue the many colonists who have been kidnapped. Stardust Empire helps you to solve several role-playing game-style problems. You must make decisions about resource allocation, construction of city layouts, and which buildings should be used in the construction of the starship. The game supports hundreds of different planet types, cities, buildings and items. Features: - Hundreds of different planet types - Hundreds of different city layouts - Hundreds of different buildings - Hundreds of different items - Easy game management via a dynamic, intuitive interface - Ability to start a colony from a preexisting planet - Easy ship design - Friendly physics - Simple and intuitive gameplay - Huge replay value due to the many different planet types and the thousands of different items and buildings - Possible ending at level 100 In the beginning, you have to build a colony on a new planet. You may choose between numerous planet types and you can start the colony on a preexisting planet. When your colony is completed, you can start trading for your first building. You can decide for your own, the layout of your buildings and which structures you want to build. When your colony grows bigger, you can
