The installation procedure is rapid and does not require special attention. Its GUI is made from a regular window with a well-defined structure, containing standard and advanced options alike, for all types of users. Adding audio tracks to the list is done using either the file browser or drag-and-drop support. Batch processing is supported, meaning that you can convert multiple items at the same time. All you have to do is select the output directory and start the encoding procedure with the click of a button. Details are shown in a Command Prompt window. Advanced users may tinker with some audio settings when it comes to the encoding level, post-task file verification, and ReplayGain calculation. Furthermore, the tool can be set to delete the original files after conversion, keep foreign metadata, create and read files as OGG-FLAC, execute extra command lines, as well as embed a cue sheet
