READ MEUnlocker - This video discusses and demonstrates how to install Mac OS X 10.7. There are some odd settings on my Mac that don't seem to show up on the system. If I connect my Mac to my Windows PC via USB cable, it starts to boot. But after trying several times, I can't boot the system. Instead, I get an error saying that I don't have access to my Mac. I tried to install a Windows Vista boot disk. And again. I got the same error. I have internet access both via Ethernet and WiFi.
