There are four main types of brush: hard, soft, regular and pixel. Hard brushes are called "hard" because they are used to apply a sharp, clear edge to the image. Soft brushes are used to apply a smooth edge to the image. Regular brushes have no special settings. You can use regular brushes to do very simple graphic operations. Pixels (also referred to as standard brushes) can be used for painting and for retouching images. Pixels work much like the built-in Photoshop brush, but you can choose the size, shape and color of the pixel. Some of the more useful Photoshop brushes include: Paint Brush: The Paint brush is useful for painting, drawing or retouching. You can adjust the size of the brush to make it larger or smaller. The brush's edge is soft, softening edges or adding detail to images. Brush and Pen Tool: This tool allows you to draw your own shapes. It is useful for creating custom effects and for making complex designs. Unlike the Paint Brush, you don't need to use a mouse to select the tool. You can use your finger or the eraser to shape the stroke. You can also adjust the brush and pen tool as you work, by clicking on the arrow next to the tool. Eraser: The Eraser is used to remove objects from your image. With the Eraser tool, you can erase (or clean up) stray or unwanted objects. Erases can be used to delete objects or entire areas of an image. You can also use the Eraser to soften or smooth out edges. Highlighter Brush: Use the Highlighter brush for highlighting objects in an image. You can adjust the size and color of the highlighter with the Brush tool. You can also adjust the hardness of the brush. The softness of the brush tends to soften the highlighter. Fuzzy Pencil: Use the Fuzzy Pencil to create various effects. You can use the tool to soften edges or add layers of texture. You can also use the tool to create patterns and to draw simple designs. Airbrush: The Airbrush is used for painting in the background of an image. You can adjust the size of the brush to make it smaller or larger. You can also adjust the hardness of the brush. The softer your brush, the softer your effects are. You can also adjust the flow of the Airbrush. Clone Stamp: The

The Brush tool is used to paint and edit the image. The Pen tool allows you to draw lines, paths, and closed shapes. The Magic Eraser is an available tool for removing unwanted elements from an image. It works best in conjunction with Paint. The Channels Panel allows you to view and modify different color and grayscale information within an image. The Filter Gallery allows you to filter images. The Color Panel is where the actual color of the image is displayed. It also has tools available for manipulating it, such as adding a hue, saturation, or tone. The History Panel is where image editing information is stored and can be viewed. You can view the path, as well as the copies, edits, and auto corrections made to the image. The Levels Panel is a tool for adjusting the brightness and contrast of the image. It is useful for details in the image to become more obvious, which is

particularly useful if the image has been compressed. The Pen tool is a drawing tool for creating vector (bezier) paths, vector lines, and vector shapes. The Paint Bucket tool can be used to select an area and fill it with a color. You can use this to replace a color in an image with another, add color to an image, or remove color from an image. The Smudge tool can be used to paint over parts of an image in an effort to change its appearance. In addition, the tool is useful for adding a blur to the image. Toner is a type of color found in scans and on original prints. It is represented by the E colorant and differs from cyan, magenta, yellow, and black. You can use the Eraser tool to correct mistakes in an image. You can use this to erase unwanted lines or shapes, or paint over other elements in the image. The Soften tool can be used for smoothing parts of an image, for example, by adding a blur to the image. It can also be used to soften the edges of an image by reducing the contrast. The Sharpen tool can be used to improve the overall quality and definition of an image. This is useful for cleaning up a scan or retouching an image. The Emboss tool can be used to add depth and texture to an image. The Distort tool, which is located in the Effects panel, is similar to the Brush tool in that it allows you to paint textures, shapes, and similar textures, over an image
