Category:Indian academics Category:Living people Category:Year of birth missing (living people)Athletics News Men's Soccer, Football Nearing Finals April 14, 2012 Coached by Tessa McCaffrey, the men's soccer team competed in the first round of the NESCAC Championships on Saturday at Tilton Field, with the goal of advancing to the semifinals on Thursday. St. Lawrence defeated Amherst, 3-1, in a match that was the second to be played on the season. In the first half, against the host Jeffs, Amherst created a handful of chances including two goals by Charlie Mancuso and one by Mike Murphy. The Jeffs defense held the Saints scoreless until the second half when senior Gavyn Thomas scored. In the final minutes, Ryan McDonald was issued a yellow card for a foul in the box. He would leave the game with ten minutes left. In the second match with Bowdoin, the Saints again dominated the game in the first half with a goal each from Bradley Steiner and Greg Pecoraro. The Bears pulled the goal back by scoring on the second half, but the team could not keep up with the level of play. They finished with three shots on goal. In the third match, UMass Dartmouth beat S.U.N.Y. at Hamden Field, 3-0. The men's football team, which was defeated by St. Lawrence, 24-0, in the NESCAC Championship last year, has played 19 games in 2012 and has a record of 9-9.

The Saints are currently tied with Amherst in the loss column, 3-3. The final round of the week will be Thursday at noon, with the semifinals on Friday, at 1 and 5 p.m. The finals will be played Saturday, at noon, with the championship scheduled for Saturday, at 1 p.m. Ionophores are a diverse group of organic compounds able to traverse lipid membranes, thereby producing or enhancing the uptake of specific ions. Certain ions, such as monovalent cations (e.g., sodium, potassium), and biologically important anions (e.g., chloride, bromide, phosphate, sulfate, nitrate, carbonate, and, in plants, organic acids) are tightly bound to membranes and their concentrations are tightly regulated. However, other ions (e. 82138339de
