Darkest Hunters is a collaborative effort by DC Comics to publish unusual fantasy stories featuring some of its most popular super-heroes. It began in 1997 and ran until 2002, during which time it changed several times and contained many different stories. Three issues are known to exist. Darkest Hunters: The Crucible (Vol. 1) Plot Summary A mysterious pre-Adamite alien species is invading planet Earth and using powerful energy devices to destroy it. Heroes are arming themselves with weapons of their own, as well as advanced alien technology that has been sent to Earth by their own alien benefactor. The heroes are about to enter a battle in which no one may survive. Can any of them possibly be prepared for what they may face? Or, will their adventure be over before it begins? Night Road is a side-scrolling action/adventure game. It features great visuals, music, and sound. The controls are responsive. This first-person title has five playable characters (two female). To support this game, please consider providing us with a review! Recent Reviews: This review is from Amazon.com Review: A very short, fast-paced game for the iPhone, with interesting graphics. You have a choice of two characters, light or dark, and you have a finite amount of "fuel", which might be offensive to others. You can change between the characters by tapping the various icon at the bottom right of the screen. There are a few items that you can obtain, and you can also obtain "bonus items" that are unique to each character. There are treasures, but they are hidden away so much of the time that you will not find them. Sometime around the end of the game, there will be a symbol that you need to bring with you to open the next area. It will be on the ground in front of the next "signpost", which is a series of small symbols along the top of the screen. There are 5-6 stages per character. You move with the left and right arrows and there are also left and right "taps" to jump when they are available. There are also arrows to other things that you can jump to. If you tap the "pause" button, you can take more coins and supplies, if there is any. You start out the game with a torch

that you can tap to light up the area, which also will burn some of the fuel in your case. You can also blow on the torch to make it light up better, but it will not burn all of the fuel. You must make your way through various traps that your character can step on or avoid. The spiders, snakes, and other creatures are very aggressive and they chase you at every turn. You must find some way to defeat them so that you can move on. The bugs and insects are also aggressive. You must kill them if you wish to move on, but they are also a necessary part of the game for some of them. There are some wonderful games on the App Store. Having worked at one of the top 3 for a time, I know how hard to make a game and market it, but I also know there are some very good apps on the App Store. So, we
