Halloween is fast approaching, and the holiday is coming very early this year with a new release of the film adaptation of Stephen King's The Dark Tower movie. As a result, in his novels and in many other forms of media, horror now

seems to be the norm for the average youth, and not the exception anymore. That being said, the new film in the Dark Tower series, *The Dark Tower*, gives the new generation something fresh and original to be scared of, something that is not out of the norm. *The Dark Tower* is a horror story with a twist: the heroes of the story are the main characters of King's series of books; in fact, the universe of *The Dark Tower* is an amalgamation of many existing King settings, including the *Wizard and Glass* series, the *Eyes of the Dragon* series, and the *Dark Tower* series, all merged together into one story. The adaptation movie was written and directed by Nikolaj Arcel, who has previously worked on

the films *A Royal Affair* and *The Hunt*, which, although two very different movies, both contained spookiness and jump-scare factor. The film is very well-made, and it is interesting to see how King's universe is translated and merged to fit the movie's universe, while also maintaining its own individual format. The decision to make his hero the main character makes this movie stand out, which is a risky strategy at times, but it was worth it. The
