What's new:

★ The development team of KING OF KINGDOMS had an unprecedented and risk-loving concept (i.e. “Kingdom of the World”) since its beginning as “KING OF RPG”. After beginning development for the first project using a combination of its previous game “KING OF RPG” and its solo game “ROBOT: The Resurrection”, the development team skillfully combines its previous game mechanisms and the DKC2 engine to precisely create it with a story that is yet to be seen via the setting of the world in the future (after the times of the wars of kingdom) based on the King’s End. It is expected to be a possible game that will draw people who like RPGs.

We at Powerchi are holding out for a wonderful FANTASY action RPG with potential that will provide our player’s with an unexpected experience with robust contents and a fascinating story.
