The Elden Ring was once the crown jewel of an ancient civilization, however, as the era of magic came to a close, it was lost in the forbidden lands of the Lands Between and was forgotten. Now, a new story begins. Rise, Tarnished, and you will become an Elden Lord and explore the Lands Between together with your fellow players. Whether you play alone or with others, you will find yourself immersed in a large-scale role-playing game. There will be a long life ahead for our game, and we are currently preparing a large-scale content update scheduled for 2018. We hope that you will play this unique game until that time! HIGH-RESOLUTION HINT: MFG: Dragon Quest Maker Let us know if you liked the video, leave a like, and please consider subscribing for more videos like this. Thanks! Hey guys! James here again! So if you're new here I wanted to thank you all for watching! It really means a lot to me that you keep coming back to my channel and leave me such nice comments. For those that have subscribed to my channel it's because you're a great community and I really appreciate all the support! And now let's get to the video! In this video I'm going to be showing you how to beat the first dungeon, Fafnir's Den! To get to the boss you have to defeat four smaller bosses and break out of the dungeon! After that we get to talk about our new weapon, the Flame Blade! It's a high-damage low-health weapon and gives you multiple attacks! In this video I'll be sharing all the knowledge I can muster about the weapon, and giving you a few tips on playing it. I hope you enjoy the video! It was a lot of work but it was a ton of fun doing it! We haven't finished yet, I still have to take down Fafnir, of course! I did it once last week and you guys will see that I still have to do it because I could definitely make this video 3 or 4 times longer! haha. But that's about it for the moment, let's wrap this up so I can get on with another video!Four people, including the family of a cancer patient, have been burned alive by a

Features Key:

Fortress: To Survive Enemies can be found from within dungeons as well as outside of them. Enemies have more accurate hit probabilities and evade repeatedly until defeated, so you can feel even more tension and high-speed play.

Angler This feature shows attacks and counterattacks along with the flow of the battle in 3D space. It gives you full control over the field of play, making it simple to find the best attacking position and create offensive and defensive routes.

Room The character movements in front of the map are limited so you can get a good idea of the battlefield by viewing a frontal map. When using the attack and movement commands, a picture of the battlefield is illustrated over the "room" on the map screen. You can also set what is displayed in the room screen at any time to suit your comfort level or choose how the position of objects changes when they are selected and released. By adjusting the scale of the map, it is easy to view the entire battlefield on one screen.

Armor A free system in which your character wields various weapons, strikes enemies, and changes their equipments. Choosing equipments on the interface, change the equipaments your character wields and gain power to attack, block, and use certain moves while the equipaments are equipped.

Customization As you customize your character, you will be able to change many things such as the color of the armor, the texture of the weapon, and the symbol on the shield. You can also change the face textures, hairstyles, hair colors, and backpack colors that are used when you equip weapons, armor, or magic items.

Changes in content and stability via updates The game will be updated a number of times in the future and the game will always be ready for players to enjoy the game to the fullest.
