Let's see what this game has to offer. You play in the Royal Academy, the Royal Family, and many other mysterious groups. You can also switch between them, enter dungeons and even fight with your powers, as you become an "assassin"! And of course, there's a little bit of strategy mixed in. The most interesting part, though, is that you can play as the other factions. Various dramatic scenes will unfold depending on the side you play!

The various characters in the game can switch between their own side and the opposing side. So, if you choose the Royal Family side you can play as Alice or Max and, if you choose to switch to Sigma's side, you can play as Hasegawa-san, the doctor of the academy. You will also have different sorts of transformations depending on what side you choose. For example, you can turn into a white dog as Catania, but only when playing as Alice.
