Greater Undead is an RPG setting of infinite horrors and eldritch powers born from a mixture of death and undeath. In this world you must fight or run, but you can't hide. This game can be played without using the rules provided in the Token Pack. The Tokens may be purchased separately to the rules. All you need is a copy of the world, easily found through online retailers or from the PDF format (for the full PDF, visit the link on my download page). If you're looking for gameplay not only based on pure statistics, then get the full pdf that comes with the Greater Undead Token Pack. This requires some...freedom. If you want to only play the Vampire and Undead game styles, then please purchase the Vampire and Undead Token Pack. For those of you looking for a full group of undead players to play against, then purchase the Greater Undead Token Pack. Then you can have all the Undead players that come with this one package to play against. This pack contains 40 Undead and 5 Vampire monsters. This token pack only contains creatures. Use the Undead section of this document to help flesh out your party of Undead (not within the Undead Token Pack). If you enjoy this pack and want more, then please consider purchasing the Basic Undead Token Pack. Ronaldo opened the scoring in this year's group matches for Portugal, the reigning European champions, in a 2-1 friendly win over France in Paris on Tuesday. Ronaldo, who netted five times in a 3-2 win over Spain on Tuesday, set up Fernando Santos' equaliser in the 68th minute of the USA match in what was an entertaining encounter at a lively site in Carson, California. The Spain striker was forced to withdraw in the first half after sustaining a knock, however, leaving Julian Green to score in the second half to secure a point for the USA. The US forward had won the penalty he converted in the 15th minute and went on to score in the 45th. But that was not enough to secure a point for the hosts, who are preparing for the 2014 FIFA World Cup in Brazil

Birds Grebes There are several species of grebes in Australia, including the world's smallest heron. Order Charadriiformes Family Platychimidae Scientific name: Aechmophorus occidentalis (currently known as Platychimus occidentalis) The grebe or platychimid is a small water-loving bird, and the only one in the genus (Platychimus). It is widely distributed throughout eastern Australia, with a population of about 260,000 birds. The species was long classified with the auks (Cisticolidae) and the Gaviidae, until the relationships of these fish-eating birds were better understood. One of the world's smallest bird species. The grey platychimid (A. occidentalis) (Photo: Wikimedia Commons) Aechmophorus occidentalis prefers to live on open saltmarshes. It is a fast and forceful swimmer, often swimming backwards. Like other grebes, aechmophorus wanders and flies through open water and lays its eggs singly on the water's surface where they incubate. The young are cared for by both parents and are able to fly at about one month. If the chicks are unable to fly, their legs are strengthened by the father, who keeps them afloat until the chicks are able to fend for themselves. Most Australian grebes become adults at about 15 years of age. The name, which literally means "wandering follower of shores" comes from the Greek word aechma meaning "shore" and philos meaning "foot". The are European birds of the genus Aechmophorus, and indigenous Australian birds of the genus Eudyptula. Sally Lightfoot Grebe The first common name for grebes wassault, from French. This has fallen out of use, but they are still known as sallies or saulses in parts of their natural range, and they are now more often called grebes.
