What's new in Operation Armstrong:

, Coming Soon! Posted by Oli on Today we get to make a mostly bad pun, as we discover what Kragg has been plotting in our holiday competition. This is where things can start getting a bit out of hand, as we introduce you to Kragg, the totally awesome character. He's an armored party of dastardly villains and lots and lots of cannons (big and small), ready to fight you and each other in an Unreal Tournament arena! All of this is about to be revealed on Christmas Day, and there's no time to lose, get yourself geared and ready, because you're not going to want to

miss out on Kragg's adventure. In the meantime, we want to show you what we've been up to, with a few images of our characters on our clothing assets team. To break the secrecy, we're throwing a Christmas Party to reveal our assets! They're only for the former Kragg, Future Kragg, and Time Kragg elements. Are you the party guy? Introducing: Being a character-focused game, Rivals of Aether is the perfect way to get into Unreal Tournament. Each player brings their own character into the arena, where they challenge other people's creations - a practice match where you experience plenty of fun and an exhibition event for top players to show off their creations. Prepare for a big overblown depiction of the tournament event, when the top contenders fight it out in Epic Arena! We've got crazy costumes, guns, and elaborate weapons, but you'll have to wait to see them all in coming this holiday season. Meet the Character Artist: As more Kraggers join the fight to become the Kragg Champion, we need more clothing assets to bring their style into the battle. That's where Emvion and her team of clothing asset creators come in. In this competition, we have three elements (Kragg, Future, and Time) that will be represented by three separate clothing characters. There's more to Emvion than meets the eye, especially for this competition. I've never been a traditional clothing artist, since I was always drawn to environments and special-effects, but I like to draw a little. Like most artists, I generally study a character or pose type for inspiration, then come up
