Nephelia, a nation known as the Elden Ring. The King who rules the nation is a wise and benevolent king, but even the most dedicated people cannot help but be deceived by the promises of a young corrupt prince. The young prince brings disaster to the Elden Ring, but those who are suspicious of the prince's sinister intentions are ruthlessly hunted down and slaughtered. The survivors are scattered, each trying to escape in order to find a solution. In this end there are those with a deep hatred of the corrupt prince, and those who wish to vanquish the corruption and prevent it from spreading. In addition, there are those who exist out of necessity. Either they have been relegated to a society that worships the prince, or their birthright has been taken from them. The lost children of Nephelia are all in the same desperate condition. [The Creators] KOBAYASHI Keishi JOURNEY TO BARD'S FIRE. Let's make that happen. - BOOM! STUDIO BOOM! I'm certainly not one of those people who rides around in bicycle shoes and separates from the herd. Maybe I'm not aware because I don't need to be. For one thing, I've got a car. For another, my life is defined by a single physical attribute

What's new:

But hey that's normal when it comes to fantasy games... Fantasy games usually get a new version every 2-3 years or so Like its predecessors, this game has upgraded graphics (there's really little that a game can do to impress you visually anymore), made a few changes to the gameplay (mainly changes to things that older players found annoying

in the previous version), released the full enemy and party guide (the only possible complaints at this point in the release cycle), and compressed the save files to save bandwidth usage when playing. None of this really matches the the newest games in the genre (Skyrim, Witcher 3, Grand Theft Auto V, etc) and rather than be impressed, it's easier to be slightly disappointed. As was the case with the previous Elden Ring games, the new version has better music, effects, and sound. Now, the problem here is that these sound updates don't really match up with the artwork of the game. While I would prefer to have a game have better music and effects compared to the artwork, that's not actually the case in Elden Ring 3. The 2 new pieces of music and one new sound effect are now coming second to the younger-generation artwork. The magic system has definitely been improved as well by being streamlined. As for the combat, I imagine that most people already knew the combat was going to be greatly improved anyway. The biggest change it faced was with the real world nobility system, which was essentially redesigned for this new entry in the genre. The nobility system was originally introduced in the latest Elden Ring game, where you'd use it to raise the cost of your equipment. In Elden Ring 3, items that are sold in a shop are now priced based on your honor (which is also used as currency to buy new equipment). Honor ranks are now display in the personal inventory and are meant to make each player feel like a real leader of the masses. That's fine and all, except for that getting honor doesn't actually play a significant part in the game's new combat system (which revolves mostly around fighting monsters). Other than that, there's not much else to say here. The game is pretty much exactly what one would expect from a 3rd Elden Ring game (with a few new features). If you enjoy fantasy RPGs like myself, there really aren't many games out there with this particular genre. If you're even looking

for such a game, then you might want to look into World of Warcraft (which is still loved by most)
