Question how to live video player before? ok I have purchased two real video player now.first one is second is and I was wondering how I can make a thumnail stream on my theme front page of the site or of wordpress on which I will insert a the frame and can link to all 3 of my video pages on it, so my clients could click on the video

to which they want to watch it. how I do this on Wordpress? I know I need to install the video player but I am not really sure where to put it when I do how to get it to function like the play.com videos? I have a doubt about WP Video Video Player. How can I add a theme front page? A: I have set them both to default on the theme and the video player will play by default. Then in the settings of the video player I added the three pages that I want to link to. These are the steps I did to get it up and running. I have both my.com and.fr pages going for now. First I

downloaded the video player, and I plugged it into my media/editors. Second, I uploaded each video to my wordpress site, and set the settings to default. On the wordpress site I created three pages for each video, by clicking on "Pages" in the top right corner of the admin area. I then selected "add new page" and put the following text for each: >>Video title here So just copy the url of each video and put it in the text box. Then save each page. Lastly, I clicked on the wordpress editor to publish the pages. I then went to the settings for the video player

and added the three pages I created. I also had to click the "save changes" button in the top right of the video player screen. I

hope this helps someone someday. Note: I have not tried this out on a different server or different theme. FYI. Rhonda -----
