ICUMSA Method GS-13 for the Determination of Sulphated Ash in Brown Sugar, Juice, and Syrup 2nd Rev. The book contains the procedures and laboratory methodology described in detail by Icumsa, along with an introduction to the. Official Website for ICUMSA Methods of Sugar Analysis for the Determination of Sulphated Ash in. Book. Code: ICUMSA1998. \$29.99.Q: Is it possible to get a.csv file created by VBA Excel with all the formulas and number references I'm currently writing a macro which creates a.csv file for export purposes. Is it possible to have it return with all the formula references to the corresponding cells with numbers? It is important for the users to be able to work on the csv file as you would do on an excel sheet. The reason I want this is because we use the files as a "journal" for all changes to the cells. The macro should be something like this: A cell A1 references a text A cell A2 references a text and a formula The

output of the macro can be a csv file in which there is reference to cell A1 and A2. A: As I understand, you want to modify A2:A2 to contain a concatenated formula in which A1 is in the first argument. Assume A1 is C1. Put this code in the ThisWorkbook module.

```
Dim rng As Range For Each rng In  
ThisWorkbook.Worksheets("Sheet1").UsedRange  
rng.Formula = "=CONCATENATE("""&rng.Address&""",  
,"""&rng.Formula&"""*""&""""""", """" & rng.Address &  
""")" Next Change "Sheet1" to the name of the sheet  
containing A1. If needed, you can separate  
rng.Address from
