A simple and efficient tandem intermolecular cycloaddition reaction of diarylglyoxals: new access to functionalized aromatic chromones and chlorocoumarins. A new class of aromatic chromones and chlorocoumarins has been synthesized in moderate to good yields by a tandem intermolecular Diels-Alder reaction of diarylglyoxals. The reaction proceeds via tandem formation of an 1,4-dienediyl intermediate and subsequent intramolecular cycloisomerization. Friday, November 19, 2012 This image was taken at Getty Images. Note the pretty, almost red barn in the background, the nicely textured snow, and the word "Holiday" in the upper left corner. I love this scene, shot on a very warm day, not cold temperatures (although, at least in the US, this normally happens around the Thanksgiving/Christmas time). Since it's December, I decided to keep it simple, black and white and with just two colors. I find black and white, especially monochromatic black and white, just look very bright and clean. I enjoyed this image and I'm very happy I took the time to place this image on Flickr. Wednesday, November 17, 2012 I was at Getty Images today (shooting something else, another client) and this was shot just in front of the window. It's such a beautiful winter scene. I love the red barn and the overall crisp feel of the image. This one was not so difficult, a bit of varying exposure trying to balance out the color and the white bib. Friday, November 12, 2012 I was at a fine art show in downtown Billings, MT at the Billings Expo Center and was taking some photos for my portfolio. I stopped in to take these two images. These two images started out different, with the easy one, let me
