My version of minesweeper is simple and fun. Simply tap the numbers to reveal the mine. You can also click to clear the mine. To improve your timing, clear the mine at the top right when you get it. There are 45 different levels for you to beat. To help you beat each level, the game will guide you along the way, by showing you a path where all the mines are revealed from the bottom left to the top right corner of the board. To improve your timing, clear the mine at the top right when you get it. Since it's just a game, I have no need to tell you how to play... good luck! Show More » What's New - Minor bug fixes and improvements. - Now, you can choose the time you want to clear the mines. You can choose between immediately or after a set number of clicks, or just keep selecting it randomly. - If you are making a level you can now remove mines with a single click and easily undo them. - You can now select and copy levels to share your best times with the community, while leaving your own score unaltered. Download Link Direct Link: Game Reviews Game Instructions The game looks much better then the original and the game is now way better. I hope this app will get better and better. Great game and very addictive, the only problem is that the game has been available for a while now and I've just found it recently on Android, I'm in the process of submitting it to Google Play, but it would be nice to get a review before I do that. I'm a big fan of minesweeper and this looks like it has the potential to be an excellent replacement for the original. You can either play one of the 45 levels, or use a time clock to set a timer that will clear the mines. This allows you to get the best time at each level, or to just run out the clock to play for fun. I really like that the game is a one touch affair, though there are two puzzles that require mouse clicks. There also seems to be a lot of room for improvement if the developer is willing to spend the time to make it better, which I assume he/she is. The best minesweeper game I've ever played! I don't think I could really play any others! It's up there with Tet

We hope to add support for enhancements, continuous integration and release management as it proceeds. For our minecraft client, the idea was to keep it as extensible as possible. We haven't planned for any major changes, except perhaps if the need arises. In this way we hope that thousands of minecraft users can benefit from this small contribution. You can install the binaries released as part of this project and they will include updated documentation. minesweeper Minesweeper is a game where you must complete a series of clues, each of which reveal some "mine" on the board. Mines of different sizes and shapes are hidden under the board, and the objective is to cover the most squares and collect the most points. minesweeper is a simple turn-based game that is a great family game. Like chess, it comes in many types of styles, which can be selected at the start or at any time during a game. This download includes a custom-built minesweeper which is included with the program along with some media files. The grids are useful for making new and better grids online and using a past grid as a basis for creating new grids is often useful. The two main dimensions (board size) which could be used are 4X4, 6X6 and 8X8. For a simple guide to how minesweeper works, see [The Complete Guide To Minesweeper](#), on the Wizards website.
