- A Fast-Paced Combat System with Variety - The action takes place in real-time, and you can interact with characters that appear from the rifts at any moment, allowing you to feel the thrill of full-scale action. You can get a boost from your allies or not only attack enemies with your main weapon, but also use other magic that supports the fight: you can also go on a distracting rampage while warding off an enemy.
- Increased Customizability of Character Gear - With the increased customization of your character and character gear, you can freely combine equipment to develop a character that suits your play style.
 - Huge Environments with 3D Artwork - A world with a vast amount of variety in both the fields and dungeons that you will explore. The fields include a variety of different locations such as a town, a small village or a mountainous area. Meanwhile, the dungeons are thrilling places where the monsters surprise you in the darkness. You will also find enemies such as Humans and Orcs that stand in your way to the Pact-slaying.
 - An Online Space That Covers Shared Stories - You can freely use the online space anytime and anywhere. You can join a fight after meeting an alliance player, or you can interact with players who have not agreed to a set ruleset. In addition to all of this, you can share your own stories. You can share a news item that users will see and interact with your story, and share an NPC that you found and whom people will talk with, thus alleviating stress by sharing content. By interacting with NPC partners at the destinations, you can then travel, and going on an event together is just an afterthought.

Kotaku - "The Elder Scrolls V: Skyrim is one of the best games I've ever had the pleasure of playing, and The Elder Scrolls V: Skyrim: Special Edition is even better. Morrowind, its first add-on, is a masterpiece, and I was genuinely shocked when I learned they were releasing a remaster of it. I was more stunned when I learned they were going to release a remaster of the first Skyrim. That's right, the same game I loved more than all the others put together. Y'see, I had to go back to the very beginning. That was hard. I was a fourteen-year-old kid, and I wanted to play the same game I always played. I wanted to love it just the way I used to, and that just wasn't possible. I really tried. I went to the game's website and watched the 2012 gameplay video, the same one I'd watched a hundred times over. I read every blog and forum review and playthrough. I even watched the gameplay video some more. But I still felt the thrill and the awe, not of a new game, but of what I missed as a teenager. It was like watching a college film on a long-forgotten childhood TV show. When I finally purchased Skyrim, I played it a few more times, but I still felt it wasn't Skyrim. It just wasn't. And still, I was completely unsatisfied. It felt wrong. It's hard to describe, because every other video game remake I'd tried had worked, and every other Skyrim I played had felt like Skyrim. It was more than just that. It felt like it was missing something. Or maybe I just wasn't meant to find that something yet. Maybe it was just my uncle, a fellow gamer I grew up with who I hadn't seen in years, who finally reminded me of what I missed about old-school gaming. It was like he was right there, in the room with me, secretly going into the game and explaining how to do all the things my own memory alone couldn't explain. "It's like this," he said, and he led me through a new method of combat, one that was barely touched in the 2012 version. The path to max level. I had to take a new road, but I didn't know it was a new road. It was just an old road that was new to me. Skyrim may not have been new, but it bff6bb2d33

I thought of writing a solid blog post on re-opening this game but decided to write something else instead. Re-opening a game not related to press and negative things can actually benefit the game in the long run. The lack of a comprehensive review on the game makes it difficult to use the game for future patches. The more people know about the game, the more likely it is to get patches and expansions or updates in the future. To anyone who has a problem, please use the Make a Request feature to submit a ticket. To all those who support my work, please use the Thank You feature to send a message of appreciation for all my hard work. That is all. This is my opinion, please do not attack me or any of my replies.
