Available from June 4, 2017 Heading to PS4 / PS Vita Tough battle and lots of fun. Welcome to the Elden Ring game! (SRPG)

◆ System Overview Please play the game and judge it for yourself. The combat system is a real-time battle system where you have to act on an immediate basis in order to win. Battles with your own characters take place in real-time. The core element of the combat system is the “Spell System”, where you must attack by means of “magic”. You can attack and use “spells” through a control system called “Action”, while the rest is handled by the AI. The selected character can only attack when its “Action” is not full. You can attack directly with the action button, or use magic. In this way, even if you are out of stamina, you can fight. In addition, if you use your action twice

consecutively, you can attack more enemies at once, increasing your overall attack power. Magic is a kind of “motionless movement” that accompanies what you are doing. It allows you to freely move and attack without regard to being out of stamina. However, magic is limited in what it can do, so you must be careful. You can freely set your priority, and attack as your character wishes. In addition, when you use magic, all of the characters with the same trait are able to activate magic at once. ◆ Game Story The Kingdom of Rolcadia, located north of the Lands Between, was once ruled by the powerful and prosperous royal family. After 200 years of prosperity, the king was assassinated by a nobleman who wanted to usurp the throne. The king was succeeded by his two sons, who were opposed to each other. In the middle of this political turmoil, a loud and angry cry

resounded from the Lands Between. After it was over, the cries began to appear from various parts of the Lands Between. Many people were saying that they heard a loud voice saying “Please, help us” (translated from the original Mobal language). Some of them claimed that they saw a figure on the horizon.

Game Locations

The game locations are open fields and huge dungeons which have been carefully designed and reconstructed from the original WORD documents. The open fields have landscape details similar to the village maps of traditional fantasy RPGs, and each of them has a variety of scenery and storytelling potential. The enormous dungeons have a structure similar to typical RPG dungeons, and cover an area bigger than the battles of some software titles. The various stories are going on simultaneously in a single location. Players can freely go anywhere within the map without having to go there first. Your character can travel from one map area to another in one turn. Players will always have a variety of routes to take to move into new areas.

What's New in the Release Version 1.0?

Here are some answers to common questions about the new release.

- **Multiplayer is supported!** You can connect with up to four players at once. However, since the game consists of quests that require a specified quantity of people, and the game story is in its earliest stage, it is recommended that you arrange to play together with friends.
- **Dynamic Backgrounds!** Although your character is no longer *required* to have a background with

a solid color, it is a good idea to still use colors that are non-visual instead of dull shades. This will increase the character's image quality and help players better distinguish objects from backgrounds.

- **Layout of Search Dungeons!** The layout of dungeons
