Screenshotter is an app that quickly saves a screen shot from a computer or Android device (including tablets) to your computer. Our app is easy-to-use, quickly creates and saves screen shot images and has a clean interface. The app also features a duplicate view that duplicates the entire screen and a navigation view that allows us to hide the preview panel and the navigation buttons. You can save images, such as screen shots, photographs, video clips, screenshots, write text notes, draw notes, draw a picture, edit text on the screen, and much more. You can easily select the text you need to edit, and the app will automatically crop the image for you, or even resize it for easier viewing. *** Saving of images for iPhone, iPad is coming soon NOTE: Some Android devices are not supported, they are: Please reply to this review if you'd like to see other devices supported. For any technical support issues, please reply to this review. Introduction Get rid of boring and tedious paper notes. Create simple notes on computer using your voice. Take your voice notes to school, to work, anywhere. You can also add images or stickers to your notes from Google drive. Usage - Create notes with voice or text using microphone or typing - Take notes in your school/work - Add images/stickers to your notes - Send notes by email - Email the notes/attachments - Sending notes as attachments in email from the start screen - Attachments with external storage devices - Attachments with your Google Drive - Manage attachments from your Google Drive - Manage attachments using your Gmail account - Manage attachments within your Gmail account - Attachments from one note to another note - Show note title on smart carousel - Add dates to notes - Set date/time limit for note - Auto delete notes older than note limit - Turn on/off note synchronization - Attach files to notes - Attach files from your Google drive - Attach files from your Android/iOS devices - Attach files from your Gmail account - Attach files to your notes Requirements Some of the features will require you to have a Google account and Google Drive account. Read the instructions to find out how to sign up for a Google account and Google Drive account. More features coming soon (comment below if you want!) Changes/Security Any changes/security issues will be

What's New in the?

ScreenCannon is an easy to use tool to quickly grab screenshots of a screen or part of a screen. You can choose to save screenshots to disk, or your clipboard, and you can even customise the file naming for both disk and clipboard. If you want to be customised further, please use any of the options in the application. There are many options for the file name and the file destination. You can set the default file name, and filename. The path to the destination can be set. How to install and use ScreenCannon: * ScreenCannon is a Portable Software. You don't need to have .NET Framework or Visual Studio to run ScreenCannon. 1) Extract the downloaded file to any desired location, and run the ScreenCannon setup program. 2) Select the "Start ScreenCannon" and click "Next" button, the program will display the "Welcome" screen. "Back" and "Next" buttons on the main window are greyed out (disabled). 3) The screenshot settings can be used by double-clicking the "ScreenCannon Settings" icon. Use the "ScreenCannon Configuration Window" to configure the program. Once you have finished, click "OK" button to save. 4) ScreenCannon will automatically start once the configuration window is closed. * To restore the program from "Temp" mode, please click the "Restore" icon from "ScreenCannon Settings". ScreenCannon helps me to capture a screenshot quickly and easy without having to save the screenshot to disk first. Now I can record screenshot anytime I want! ScreenCannon is one of best and

most popular screenshot capture software to record an entire PC screen including desktop, game, and videos. You can use ScreenCannon to capture screenshot in either the default mode or setting mode (in setting mode, you can capture any part of the screen, desktop, game, videos, and so on) ScreenCannon has unique auto-save feature. If the ScreenCannon auto save feature is turned on, the program will record an image automatically upon exiting or closing an application. You can save the original or auto saved image on different location. ScreenCannon can automatically generate the name and the folder of an image file (you can customize the image name or the folder name) by the current system date or the file name of an active application. ScreenCannon is an excellent tool to record videos in low-quality, but
