The new fantasy action RPG from Spike Chunsoft and Spike Chunsoft Europe, featuring an original story centered around a conflict between the Cracked Elden Ring With Keygen and the Third Kingdom. The combat system places the emphasis on fast-paced action, and the game is designed to be enjoyed by players of all skill levels. Check website for more info and screenshots of the game: So here's the second part in the discussion about the new Elden Ring game. This time its about how you explore the vast world and its different dungeons. It might make more sense to you if you have played The Old Kingdom so already know the basics and if you haven't give the first part a read. Then you can jump right into the new game now ? THE GUIDE: IT WILL COST YOU: In the last guide I already gave some examples of the dungeons and how they can be explored. Now we have the same amount of dungeons to explore, which is quite nice, but also a problem when it comes to the exploration. That being said I'm not 100% sure of the value of a lot of the different dungeons, so feel free to comment. EXPLORATION & ITEMS: Groups of baddies are spread across the world. You can either encounter them in battle or are you spotted and receive an ambush notification. These creatures are called "Wars". They contain a lot of loot for you to use and equip in battle and some of them contain some exclusive loot. The amount of Wars you encounter is dependent on your own actions. If you are at war with another person you are in a war with up to three allies, if you are at war with a faction, you are also at war with up to three. Once you get your own wars going (through notifications or in battle) you will no longer encounter others. So you can think of the worst case as having twice as many wars than usual, so that means twice as many loot and twice as many fights, and you are pretty much screwed when you are at war. For the rest of the time you only encounter one war and cannot increase the amount that you encounter. When you encounter another player (as a war or through battles) you are faced with the choice to attack him or her. If you attack then both of you can win (by killing the other player), you will get loot and XP,
