How to : one click and all done go to download linkQ: Get path for drawing file for.obj file I have an obj file and a model viewer (Open GL) in which i am drawing lines. For drawing lines, I am using VBO in which i pass VBO object as parameter. in VBO I have 4 vertices that need to draw, so I do not know what path to use. So I am using a double for loop to get all four coordinates but I am stuck in which loop I need to be in. This is what I have: #include #include #include #include using namespace std; double j; double y; double x; double x1; double y1; void init(); void reshape(int x, int y); void display(); double get_j() { return j; } double get_y() { return y; } double get_x() { return x; } double get_y1() { return y1; } void main() { //i am doing this because my previous code works fine and I wanted to //make sure my VBO is correctly working (also if it is static then //this is fine otherwise i need to make my code dynamic by passing variables) double x_pos[] = {0, 0, 0, 0, 0, 0}; double y_pos[] = {1, 1, 1, 1, 1, 1}; double x1_pos[] = { -5, -5, -5, 0, 5, 5}; double y1_pos[] = {10, 10, e79caf774b
