Serial key for WindowsQ: Vim color scheme basic question i have tried to make changes to vim color scheme so that the background color is a different color from the current line. In this i used the background=[color] parameter for that purpose but when i

started to work with jquery i came to know that the colors of the text items were changed. I do not need any of that i just want to make the background different from the text so that i can easily distinguish between the background color and the text. this is what i have done so far in the.vimrc file set background=[lightgray] "syntax on d0c515b9f4
