The VRS F/A-18E Super Hornet, or Superbug, is the first true 3-axis fly-by-wire combat aircraft designed for the U.S. Navy. It is a two-seat, twin-engine, carrier-capable, multi-mission, combat-capable aircraft. The aircraft is designed to be a more capable and more survivable version of the F/A-18 Hornet. It features a larger wingspan, a larger fuselage, and a larger tail. It is capable of carrying a larger payload and has a longer range than the F/A-18 Hornet. It is also capable of performing a variety of missions, including air-to-air combat, air-to-ground attack, and reconnaissance. The aircraft is currently in service with the U.S. Navy and is expected to remain in service for several decades.
