Select ICETME 2018 materials L. Vijayaraghavan, K. Hemachandra Reddy, S. M.Jamil. The considered physical model is modeled in the CATIA V6 program. 5. The object model is a combination of two components. The top layer contains a model of the antenna itself, and the bottom layer contains its schematic representation. To build a model in the CATIA V6 program, the image of the earth's surface was taken as a basis. The lower part of the model (ground cover) was depicted as two layers. First, a layer 1 mm thick was formed from the sand, then a top layer was created for it, having a thickness of about 3 mm. Thus, the surface of the earth was modeled.
