Call of Duty: Black Ops 2 is a modern first-person shooter and a part of the most successful FPS franchise Call of Duty. The game is praised as one of the best from the franchise but plenty of users suffer from serious crashing problems which make the game almost unplayable. Users can try the compatibility mode and registry tricks to fix the game issue. Black Ops 2 for pc is an action game created by Treyarch that has gained a mass of fans since its release. The game was originally launched to the public on November 12, 2012, and today it's still an extremely popular title. Due to the success of the game in the market, it became a flagship of the Call of Duty series. The game has also received a few updates that have fixed many bugs and made it more stable, but still, the game has many bugs, which sometimes cause crashes and game freezes. The game becomes unplayable due to the unhandledexceptioncaught error, which happens when the game crashes in a specific situation. This error usually occurs when the player controls their character out of the game, which happens while the player is on a mission, while the player is on a loading screen, or sometimes even when the game starts, so there are many reports of users experiencing the error.
