houser also noted that there were many glitches, crashes, and issues, which were all fixed before the release of the game. grand theft auto iii is set in liberty city, a fictional city based on new york city and its surrounding boroughs. it is a large metropolis with three major islands and an inland area, which is separated from the islands by a bridge. the city is built in a style that imitates new york city's manhattan borough. its areas are presented in a style similar to the film noir genre, which is reflected in its architecture and feel of the game, as well as the plot, which follows a darker tone. in addition, the plot has a 1950s-style atomic age setting. the setting for liberty city has been described as a "black and white vision of the future", which is explained by an introductory video on the game's packaging. [23] the city's three main islands are portland, staunton island, and shoreside vale. staunton island is the largest of the three. it is divided into a north, central and south-central region, and is composed of an industrial district, a business district, a resort district, and a residential district. the south-central region is surrounded by the residential district, which contains smaller residential areas, while the industrial district is located in the north-central region. the city is divided into smaller districts and includes residential areas, business districts, industrial districts, and transportation hubs. the city's main district is known as the docks. it is divided into two main areas, the "docks north" and the "docks south". portland is the only district that is not part of the docks; it is located north of staunton island. 5ec8ef588b
