## Driver Sandisk Cruzer Blade 4gb ##TOP##

i have had the following problems with my sandisk cruzer flash drive. i have tried many times to remedy these problems, but to no avail.1. the usb flash drive sometimes does not respond when the computer is switched on. this happens only when it is connected to the usb port and switched on. when this happens, the computer does not show the usb flash drive icon and it cannot be accessed. this problem seems to occur only when the computer is switched on. i have tried the suggestions posted in the following links, but to no avail.  
fix sandisk cruzer blade problem: fix sandisk cruzer drive problem fix sandisk cruzer drive fix sandisk cruzer drive usb drive problem fix sandisk cruzer drive how to fix sandisk cruzer error message  
solved: issue with samsung usb drive i recently purchased a 4gb sandisk cruzer memory card and am having difficulty using it with my hp pavilion dv6-2433dx laptop. i have tried using windows xp sp3 with service pack 1, windows vista, and windows 7. windows xp is the only operating system that works with the card. i have tried downloading and installing the latest drivers for the memory card and it makes no difference. even though the card works in windows xp, it does not show up in windows 7. i have tried formatting the card using programs such as norton disk cleanup and roxio's disk cleanup. neither of these programs have fixed the problem. hi, i have a sandisk cruzer usb drive on my notebook, i can use it fine. but i have a problem. when i open it, there is an "unknown" icon on the desktop. the icon gets to the normal size after about 5 min, but nothing happen after that. it can't be opened. what is the problem and how to remove it?
