## **Polar Express Movie Download Full Version**

We hear that as it travels through various dimensions, the Polar Express passes through a portal that takes it to a foreign world where all the people have blue hair. Apparently it also takes the passengers through a wormhole to a world of dinosaurs, and also... to snow! Obviously, the film makers cast real people in these roles, but as usual, the characters lack any believable, lifelike motivation -- they all seem to be on autopilot. (In a few scenes, we see a row

of children seated together, all wearing big red bows on their heads, and being told in unison, "Thank you," as if they were adults. But we never really find out why or how they're grouped, and we never learn who they are.) The Polar Express arrives at its destination just in time to deliver the newly departed souls to their destinations. We see the train pull into the station and observe the passengers disembarking, as the final credits begin to roll. But there's no real narrative conclusion to the story of the world and no explanation about what's going to happen to the passengers. We know that a cold frosty blast starts blowing in off the Glacier Gulch as we walk by the train's snow-sprinkled windows and slip out of our jackets and hats. The wind whips our eyes and sends ice particles into our noses. The air feels good, cold on our fingers, just the way it should. The landscape is magnificent -- the snow-covered marshland, the winter-stung shore of Glacier Gulch, the railroad yard where the cars wait. As we climb aboard, the train takes off into the frozen bay. It seems to be going northward, its locomotive blowing smoke from the stack. The locomotive is beside an express car, from which a few passengers peer out of the windows.
