## Delphi In Depth: FireDAC Downloa

in this edition of the delphi in depth podcast, we're talking about the firemonkey component set. it's been a long time coming, but firemonkey is now the native ui technology of the embarcadero delphi ide. this set of components is not only useful for creating mobile and desktop apps, it also includes the ability to control hardware and interact with the cloud. delphi is a rad tool and it is not only a great platform for creating apps, it can be used to create anything that you need to build. delphi is a fully featured programming language with the ability to create native apps for ios, android, windows, mac and linux. this week we talk about how to use the delphi ide and firemonkey components to create a complete stand alone application, a cross platform mobile application, or a native mobile and desktop hybrid application. this week on the delphi in depth podcast we talk about firedac, embarcadero's firemonkey component set for mobile and desktop apps. this set of components is not only useful for creating mobile and desktop apps, it also includes the ability to control hardware and interact with the cloud. this week on the delphi in depth podcast we talk about the firemonkey component set from embarcadero. it's been a long time coming, but firemonkey is now the native ui technology of the delphi ide. this set of components is not only useful for creating mobile and desktop apps, it also includes the ability to control hardware and interact with the cloud. in this edition of the delphi in depth podcast, we're talking about the ide. i am a bit biased, but delphi's ide is the best programming ide available. it provides a complete, but simple, rad programming experience that doesn't require a programmer to understand how the compiler works or how to write software. if you are looking to learn delphi, or if you are a delphi programmer who wants to learn how to use the newest development technologies, then this episode is for you.
